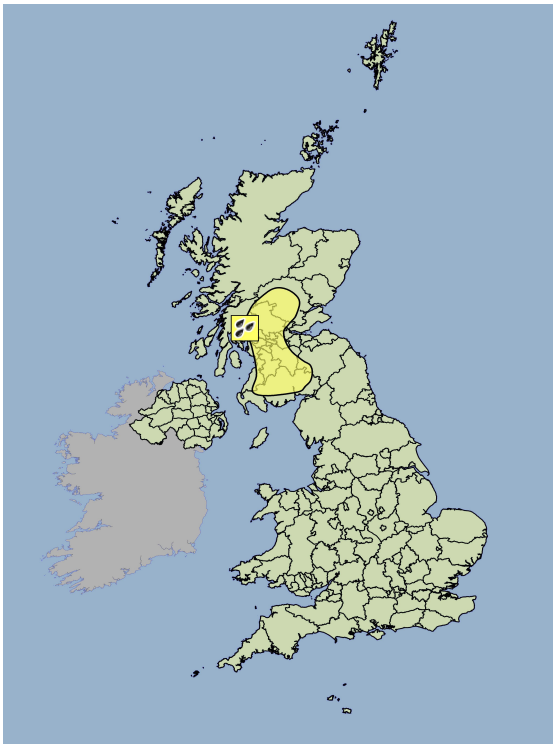
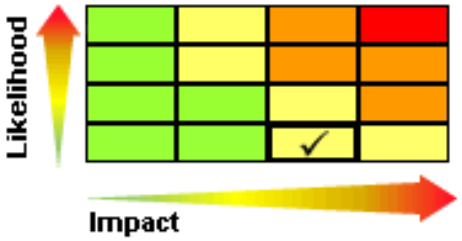
National Severe Weather Warning Service





Chief Forecasters Assessment
A frontal zone will extend north-eastwards across much of the UK during Sunday night and Monday, bringing with it spells of heavy rain as a strong, moist southwesterly flow develops. Rainfall totals of 20-30 mm are possible quite widely over the higher ground within the warning area and with over 50 mm possible very locally. Given that saturated conditions and high river levels are expected following the weekend's rainfall, further flooding is likely. The warning will be kept under review, with possible further updates.

The Met Office have issued a **Yellow Alert** of **Rain**

Valid from **00:10 on Mon, 07th Dec 2015** until **23:50 on Mon, 07th Dec 2015**

Heavy rain is expected to move north-eastwards across Scotland on Sunday night and Monday.

Please be aware of the risk of localised flooding and difficult driving conditions.
